

Characteristics

- An early medium maturing white flint maize hybrid (125 - 135days)
- Adaptable to all ecological regions and irrigation
- Excellent tolerance to MSV, GLS, Rust and Cob Rot
- Excellent drought tolerance
- Very good tip cover
- High sucrose content which makes it good for silage and stover
- Stay green effect making it good for silage and stover harvest
- Excellent standability on both root and stalk
- Good flour density
- Yield potential of +12mt/Ha

Recommended Zimbabwe Ecological Regions

- | | |
|--|---|
|  | (I) - Specialised and Diversified Farming (>1000mm) |
|  | (IIa) - Intensive Farming (750-1000mm) |
|  | (IIb) - Intensive Farming (750-1000mm) |
|  | (III) - Semi-intensive Farming (650-800mm) |

under irrigation

- | | |
|--|---|
|  | (IV) - Semi-intensive Farming (450-650mm) |
|  | (Va) - Extensive Farming (<650mm) |
|  | (Vb) - Extensive Farming (<650mm) |
