

Characteristics

- A high yielding medium maturing maize hybrid (130 - 138 days)
- Semi-flint white maize
- A top yielder in the '6' series
- Good disease tolerance to GLS, MSV, Smut and Rust
- Very good drought tolerance making the hybrid widely adaptable
- Stay green effect making it good for silage
- Excellent standability on both root and stalk
- Yield potential of +14mt/Ha

Recommended Zimbabwe Ecological Regions

	(I) - Specialised and Diversified Farming (>1000mm)
	(IIa) - Intensive Farming (750-1000mm)
	(IIb) - Intensive Farming (750-1000mm)
	(III) - Semi-intensive Farming (650-800mm)
